

PCI Labs Facility Report 2013 Environmental Update

PCI LABS ENVIRONMENTAL GHG EMISSIONS:
35% IS BASED ON OUR FACILITY AND 65% FROM THE PRODUCTION,
TRANSPORT, USE AND RECYCLING OF OUR PRODUCTS.

PCI Labs Notes:

1. Reduced energy consumption by installing high-energy efficient induction and LED based lighting fixtures, under motion sensors.
2. PCI Labs operations are not water intensive. Our water is for sanitary and landscape purposes. 25% of the landscape area was converted to organic gardens for our employees and neighbors. We also planted 6 new trees.
3. Eliminated secondary packaging on all new products
4. Implemented 100% solids Kaizen Blitz events which resulted in substantial reductions in Solid and Hazardous Waste generation
